

CALVIN JUDE D'SOUZA

Cybersecurity Engineer · AI Security Builder · CGPA 9.21

+91-8971192706 · calwin20006@gmail.com · [linkedin.com/in/calvin-jude-dsouza](https://www.linkedin.com/in/calvin-jude-dsouza) · github.com/Cal2-0

PROFILE SUMMARY

Cybersecurity engineer and B.Tech Cybersecurity student focused on **digital forensics, security engineering, AI security, and threat intelligence**. Building security platforms and AI systems with **Python, Linux, FastAPI, and React**.

EDUCATION

NMAM Institute of Technology (NMAMIT) — Karkala, India · CGPA: **9.21**

Aug 2024 – May 2028

B.Tech in Cybersecurity

Indian High School — Dubai, UAE CGPA: **9.38**

Grad. 2022

TECHNICAL SKILLS

Cybersecurity	Digital Forensics · OSINT · Network Security · Cryptography · Steganography · Vulnerability Assessment
Programming	Python · C · JavaScript · TypeScript · SQL · Bash · Git · Docker · Chrome Extension Dev
Security Tools	Nmap · Wireshark · Burp Suite · Gobuster · Metasploit · tcpdump
AI / ML	PyTorch · YOLOv8 · OpenCV · LLM Integration · Computer Vision
Frameworks	Flask · FastAPI · Node.js · React · REST API · MERN Stack

INTERNSHIP & EXPERIENCE

Cybersecurity Intern — Army Cyber Group, New Delhi

Jun 26 – Present

- Lead a small engineering team building security and AI tooling alongside development of a blockchain-based intelligence platform that tracks on-chain threat actors and illicit fund flows.
- Manage case documentation and evidence chain-of-custody workflows for active digital forensics investigations.
- Perform preliminary analysis of digital evidence, datasets, and forensic disk/file images as part of daily case intake.

KEY PROJECTS

AXON — Blockchain Forensics & Behavioral Analysis Platform · Python · FastAPI · React · D3.js · Groq (Llama 3 70B) · SQLAlchemy · DBSCAN

- Architected and deployed** a full-stack blockchain forensics platform using a **5-layer behavioral risk engine** for wallet and smart-contract analysis across on-chain, graph, economic, attribution, and AI signals.
- Built **DBSCAN-based behavioral correlation and risk scoring**, validated against **13,000+ threat entities**, to detect coordinated activity beyond static address-label lookups.

NetScope X v2.0 — Real-Time Network Intelligence Dashboard · Python · Flask-SocketIO · Scapy · Nmap · D3.js

- Engineered a real-time LAN intelligence dashboard that discovers active devices, captures live traffic, and visualizes network topology in-browser.
- Implemented detection logic for ARP spoofing and port-scan activity; documented the system in a full technical report with structured appendices.

VaidikaAI v3 — Multilingual AI Hospital Triage System · FastAPI · Next.js · Llama 3.2 · Gemini · Claude 3.5 · Docker

- Architected a multilingual triage system with multi-LLM routing across Llama 3.2, Gemini, and Claude 3.5, QR-based patient tracking, and Twilio emergency SMS alerts — shipped end-to-end in 24 hours.

OuchMyBrain.io — AI-Powered Adaptive Learning Pipeline · Python · Flask · OpenAI · ElevenLabs · TailwindCSS

- Built a PDF/image OCR ingestion pipeline generating AI-layered summaries, spaced-repetition flashcards, and adaptive audio lessons

MassEd.ex — Real-Time Crowd Safety Monitoring System · FastAPI · Python · YOLOv8 · OpenCV · DeepSORT

- Engineered a crowd-monitoring system tracking 50+ concurrent objects at 30 FPS on public-safety footage, with danger-zone logic that flagged 4 distinct behavioral anomaly patterns and triggered automated safety alerts.

ACHIEVEMENTS & RECOGNITION

- 4th Place** — Hackfest 2026 CTF · **Runner-Up** — ACEathon Hackathon
- 15+ national hackathons & CTF** · SIH · Protothon · Innovex · Multiple Top-7 / Top-15 finishes among 200+ competitors
- Best Performer** — GitHub Dev Days, NMAMIT

RESEARCH

Lucent & Kalera — Cybersecurity Research | 2026–Present

- Researching deepfake detection and anomaly analysis alongside emerging cryptographic techniques, developing practical approaches for security, detection, and privacy.

LEADERSHIP & EXTRACURRICULARS

Program Committee Head — CSI Student Branch, NMAMIT | 2026 – Present

- Lead program planning and cross-team coordination for technical events, working with student teams, administration, permissions, and venue logistics.

Event Coordinator — PROTON, NMAMIT Cybersecurity Dept. | 2026 – Present

- Coordinate cybersecurity events and technical programs, managing execution across teams, logistics, and participants.

Class Representative — NMAMIT | 2025 – 26

- Represented 70+ students while co-organising CTFs and student-led technical and entrepreneurial events.
